Discount Impact

Insights:

- **New York** leads at **\$0.78M**, ~3x Berlin — worth examining what drives this to replicate elsewhere
- **Praline & White Chocolate** drive the most profit despite lower revenue — likely higher margins, worth more focus
- **No-discount transactions** generate most revenue — discounting isn't a meaningful growth lever here
- Customers are **near-evenly split** Members (49.88%) vs Non-members (50.12%) — loyalty program has room to grow
- **February dip** recurs in both 2023 and 2024 — a genuine seasonal pattern worth planning around
- Revenue, Profit, and Margin grew **modestly YoY** — stable, not rapidly scaling
